These pages contain all the pieces you need to make a lapbook on the Greek Pantheon as well as some of the mythology.

Basically, all the components can be cut out along their borders, with the dotted lines indicated folds. Use a standard office folder to create a portfolio, and glue all the pieces inside. There are photos below to show an example. I've refolded the folder to create a split cover (standard format for a lapbook). You can get as creative as you want to arrange all the bits and pieces. There should be room for everything.

The folded pieces open up and information is written in the blank spaces by the person making the book (either you or your child). Pieces and text can be colored in, and it makes a great project on Greek mythology when it's complete.

Overall, this project contains the main 10 Greek Gods and Goddesses, the original Titans, references to the epic heroic myths and several mythical creatures. There is also a space to draw Mount Olympus. You'll have to do the research yourself for the information, this is just a set of pages to build the lapbook.

I guess it's pretty self-explanatory beyond this. Enjoy.
