

What is a Witch?

A lapbook by Little Pagan Acorns

These pages contain all the pieces you need to make a lapbook about what it means to be a witch. I know that "witch" doesn't apply to all Pagans, but I wanted to focus on the term that is the most misunderstood.

Use a standard office folder to create a portfolio (folding it to create a split cover), and glue all the pieces inside. There are photos at the end of this package with an example of how to arrange the pieces and how to fold the folder.

You can get as creative as you want to arrange all the bits and pieces. Basically, all the components can be cut out along their borders, with the dotted lines indicated folds.
